

Math in the News Assignment

Each of you will be responsible for finding one news article this year relating to a math topic of your choice. The article can come from any newspaper or magazine and can deal with any topic you are interested in as long as it includes a connection to math (i.e. math applications in science, business, technology, music, sports etc...).

You will have 3-5 minutes to present your article to the class, and in your presentation you should explain why this article interested you, how math is used in the article, and why it is important. Choose a date to sign up and fill in your name on the sign-up sheet next to that date. **Don't forget to write down your date to present for yourself as well.** A copy of your article along with the information on the back of this page must be handed in to your teachers on the **Friday before your presentation date.**

Name:

Date of presentation:

Article title:

Article Source (Name of source and date of publication):

Why did this article interest you?

How is math used in this article?

Why is this important?
